Experience

Associate Marketing Cloud Developer

DXC Technology | Australia - NSW | 2021 - Present

- Developed Responsive / Mobile First Designs through the implementation of clean HTML and CSS practices.
- Approached projects with an agile development mindset.
- Utilised SQL queries to perform CRUD actions and assisted in database management.
- Executed solutions through the integration of SOAP and REST APIs.
- Utilised scripting languages (Server Side JavaScript and AmpScript) to enhance solutions within Marketing Cloud.
- Developed and conducted unit tests as well as assisted clients and external testing teams with user acceptance testing.

Projects

Untitled-Suite

Live Demo: <https://untitled-suite-react-app.netlify.app/#/>

React | Ruby On Rails | PostgreSQL | Material-UI | Axios | Heroku | Netlify | Jest | RSPEC | Cypress

- Untitled Suite's original intention is to provide project managers and their teams a one-stop shop for optimising task management.
- Final (group) project for Coder Academy.
- React front-end with Ruby on Rails API back-end.
- My role in the project primarily involved working on the back end, building and testing the API.
- Approached with an agile development mindset.

Workout Jungle

Live Demo: <https://workout-jungle.herokuapp.com/>

Ruby on Rails | PostgreSQL | Bootstrap | Heroku | Cloudinary | Trello | Balsamiq

- Two-sided marketplace in which Australian consumers can buy and sell new and used fitness equipment.
- Approached with an agile development mindset.
- I utilised feature sprints and implemented continuous deployment with the aid of development and production pipelines.
- The database for Workout Jungle's user base and their listings provided an interesting yet challenging experience.
